

Nahema's Phenomenon

Thoroughly impressed by the Nahema 120, Fenomen approached the CEO of Nahema to reserve a limited series of 150-foot catamarans for the company. Fenomen by Nahema – as the series will be known – will be produced by Nahema's team along with naval architect Gilles Vaton and interior designer Franck Darnet. Sailing performances have been modified to offer as much safety as possible and the centre boards are in sandwich carbon/epoxy/PVC. When these centre boards are down they will enable the yacht to get a very close angle to the wind board up, the draft becomes very minimal and higher speeds are obtainable downwind. Fenomen is a company that specialises in the design and distribution of rare and exclusive products to ultra-rich individual; Fenomen by Nahema will therefore be a series of unique sleek, powerful mega-catamarans offering amazing spaces topped with supreme performance.

One of the most impressive features of this new range is a spa pool located on the aft deck and a 30-m² multi-function hydraulic platform. When the platform is up, it hosts a custom designed tender and can be used as a drop-and-go platform for a helicopter; when it is down, it can be used as a bathing platform with a submersible swimming pool fitted out with side nets for children. www.nahema.com
